

ALPINE RACING BULLETIN – May 2014

Race Structure 2014 – Clarification of format of U10/U12 Races

Following the survey carried out during the summer of 2013 on the artificial race calendar and race formats, a number of changes were proposed. Following consultation with regional representatives during September 2013, the final formats were agreed and then submitted for review and ratification at the TD Forum in November 2013.

The BACR was updated in December 2013, but unfortunately the agreed format for U10/U12 races was omitted. This will be corrected in the next issue of the BACR.

For avoidance of doubt, the following shall apply to all U10/U12 races held during the 2014 artificial season:

All races involving U10/U12 age categories will be run using stubbie gates, over a **minimum** of two runs down the same course, with prizes awarded based on the best time from the two (or more) runs.

Race organisers should also note that updated CN invitation templates have been produced for both indoor and outdoor CN races and these are available for download on www.gbski.com
